

P. VENKATA SURENDRA KUMAR

Frontend Developer (ReactJS)

✉ Email: surendra.pullareddy@gmail.com

📞 Mobile: +91 8919909069

📍 Hyderabad, India

Professional Summary

- Around 4.5 years of total IT experience and hands-on experience as a ReactJS Developer.
 - Expertise in building dynamic, responsive, and user-friendly web applications using **ReactJS**, **JavaScript**, **HTML**, and **CSS**.
 - Proficient in using React features like **Hooks**, **Redux**, **React Router**, and **component-based architecture**.
 - Experience in integrating **REST APIs**, handling asynchronous operations using **Axios** or **Fetch**, and optimizing frontend performance.
 - Skilled in **state management**, **form handling**, and implementing reusable components to improve code scalability and maintainability.
 - Familiar with **version control (Git)** and working in **Agile/Scrum** development environments.
 - Strong debugging, problem-solving, and collaboration skills, with a focus on delivering high-quality, maintainable code.
-

Technical Skills

- **Technologies:** JavaScript, ReactJS, Html, CSS, Redux
 - **Databases:** SQL Server
 - **Libraries:** Material UI
 - **Version Control:** Git.
 - **Project Management:** Jira, Agile, Scrum
-

Areas of Expertise

- Proficient in **ReactJS** development with strong knowledge of component-based architecture and responsive design.
- Skilled in **JavaScript (ES6+)**, including asynchronous operations, DOM manipulation, and event handling.
- Experienced in using **Material UI (MUI)** to build clean, modern, and accessible user interfaces.

- Strong understanding of **ReactJS lifecycle methods**, **state management** using **Redux**, and **API integrations**.
-

Awards & Achievements

- **On the Spot Award** – Recognized for outstanding project contributions
 - **Service and Commitment Award** – Delivered high-impact solutions
 - **Cracked Digital Assessment** – TCS internal technical challenge
 - **Qualified GATE - 2019**
-

Education

- **SSC:** Sai Baba English Medium high school (2012)
 - **Diploma:** Computer Engineering, Govt Polytechnic College (2015)
 - **Bachelor of Technology:** Computer Science, G. Pullareddy Engineering College, Kurnool (2019)
-

Professional Experience:

Frontend Developer 📍 TCS – Hyderabad (03/2023 – 07/2025)

Project 2: KLM Air France

🔗 **Client:** KLM Airlines | 🛠️ **Technologies:** ReactJS, JavaScript, Redux, HTML, CSS

Description:

KLM Airlines Services Portal is a web-based platform designed to provide users with seamless access to various services offered by KLM Airlines. The platform enables users to explore and compare KLM's services with other airlines, allowing for informed decision-making. It features an intuitive and responsive interface, ensuring a smooth and user-friendly experience. The project was developed using modern web technologies and followed Agile methodologies for efficient development and continuous enhancements.

Responsibilities:

- Developed dynamic and responsive user interfaces using advanced proficiency in JavaScript, HTML5, CSS3, and ReactJS.
- Architected and developed scalable, reusable React components adhering to modern UI/UX design principles.
- Implemented efficient state management using Redux to streamline data flow and UI responsiveness.
- Integrated RESTful APIs and handled asynchronous data fetching using Axios and Fetch API.

- Translated UI/UX wireframes and mockups into high-quality front-end code, ensuring design consistency and responsiveness.
- Crafted mobile-first layouts using Flexbox, Grid, Material UI, and Bootstrap to ensure accessibility and responsiveness.
- Optimized application performance through lazy loading, code splitting, and minimizing component re-renders.
- Streamlined version control practices using Git and SVN, enabling effective collaboration and peer code reviews.
- Utilized Jira for Agile sprint planning, issue tracking, and backlog management.
- Collaborated with backend developers and UI/UX designers to deliver cohesive and interactive web applications.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of Agile development teams.
- Handled error boundaries, loading states, and form validation to improve overall user experience.
- Ensured cross-browser compatibility and optimized applications for performance and accessibility.
- Led code reviews and enforced best practices to maintain clean, scalable codebases.
- Utilized Webpack and Babel for module bundling and JavaScript transpilation for modern browser support.
- Leveraged testing and debugging tools to ensure application stability and reliability.

Frontend Developer 📍 TCS – Hyderabad (03/2021 – 02/2023)

Project 1: Sonic Healthcare

🔗 **Client:** Sonic Healthcare | 🛠️ **Technologies:** ReactJS, JavaScript, HTML, CSS, Material UI

Description:

Sonic Healthcare Limited is a Sydney-based, Australian company that provides laboratory services, pathology, radiology services and Primary care medical services.

Responsibilities:

- Implement the web application with HTML5, CSS3, JavaScript, React JS, redux, and React hooks.
- Participated with business analysts to understand the business requirements including converting mock-ups or wireframes into single-page applications utilizing HTML5, CSS3, JavaScript, and React as its core framework.

- Used git for version control of code for incremental development and day-to-day basis to maintain the code history.
 - Developed the functionalities under agile methodology and Jira processes and used Jira for task assignments, bug tracking, and fixtures.
 - Following style guidelines and annotations for integrity and brand recollection throughout the application.
 - Implementing the service integration using React JS.
 - Developing websites, blogs, and landing pages for the product and maintaining it regularly.
-
